AMENDMENTS TO THE SPECIFICATION

After paragraph 18, please add the following new paragraph:

--[18.1] In one embodiment a data frame may be encrypted and/or decrypted. A data frame may be encrypted by for example a transmitter, and a data frame may be decrypted by for example a receiver. In one embodiment, the transmitter or receiver may be configured, for example by configuration unit 220. This configuration may be performed, for example, based on information included in the a data frame or header, e.g., header 305.--
